PASADENA CITY COLLEGE
Media Arts & Design Technology

One of many California Community College programs that offer effective industry-based training that prepares students for employment.

Prepare for Creative Careers

Join a group of students intrigued by exploring design and media careers. Create projects in the programs' fully appointed digital design and fabrication labs at Pasadena City College. Try 3D printing, use CNC mills, create with laser and plasma cutters, design in 3D software and work with a wide variety of graphics programs. Be inspired by the creative process, committed instructors and innovative atmosphere.

"The math and English assignments make sense because they apply to projects I designed."

Recent high school graduates can earn essential math and English credit while completing assignments that relate to their hands-on design projects. Explore emerging careers that enhance our world, and offer excellent pay and employment opportunities.

Find Your Opportunity

Get a solid start on college when you attend all of your classes in the first year with the same group of students. You'll enjoy working together as you adjust to college, gain new skills, solve real world problems, create projects using cutting-edge technology and earn credit toward a degree.

With a broad foundation of skills, students can pursue web and graphic design; photo and video production; social media management; product development and wearable design; robotics; architecture; engineering and many other fascinating creative fields.

Get the job training that California industries need at your local community college.

FIND INDUSTRY SPECIFIC TECHNICAL TRAINING AT COMMUNITY COLLEGES

To locate programs at other California Community Colleges,

1. Go to: www.californiatechedresources.org
2. Select: CC Technology Programs
3. Under school programs, select from over 60 technical subjects. Click the plus sign to get a listing of colleges offering programs in that subject.
4. Use the map to find programs near you.
